PROFILE INFO

I am a motivated and enthusiastic 9th-grade student with a passion for software development. My interest in this field began at an early age and has only continued to grow as I learn and explore new technologies. I have a strong foundation in programming languages such as Python and Java, and I am constantly seeking to expand my skillset through online resources and personal projects.

PROJECTS

AthleteClub — 2019-2023

Created a athlete club website using reactjs as a fronted and firebase as backend which allows user to authentication using their mobile number by verifying it through OTP as well as social media authentication.

Ecommerce Website — 2019-2023

Created an ecommerce website using MERN stack which also include an admin panel for administration.

Smart seller Android Application — 2019-2023

Created an android application ecommerce application using java and firebase to store data and authentication them through various options.
